

System Hygienics Named as Fire Resilience Excellence Awards Finalist

2 months ago

System Hygienics, part of [PTSG](#) Fire Solutions, has been named a finalist in the Fire Resilience Excellence Awards (FREAs) 2026, shortlisted in the Outstanding Organisation category.

The FREAs recognise exceptional standards across the fire safety and ventilation compliance sector and the shortlisting acknowledges System Hygienics' three decades of specialist expertise in fire damper testing, maintenance, ventilation cleaning and remedial works.

Founded in 1993, System Hygienics and its team of 100 engineers joined PTSG Fire Solutions in October 2025. The business serves clients across healthcare, education, retail and commercial property – ensuring buildings meet BS 9999:2017 fire safety standards and remain compliant within the required 12-month testing cycle. As longstanding BESA members, the company follows TR19® and DW144 guidelines across all its testing procedures.

The nomination recognised several significant client partnerships in sectors such as healthcare, manufacturing, hospitality, education and defence.

The FREAs 2026 winners will be announced later this year.
