

Tecker Limited joins MARCH®

2 months ago

Tecker Limited, a specialist MEICA engineering provider based in the South West, has joined [MARCH®](#).

Tecker brings strong regional expertise in mechanical and electrical design, control systems, panel build, installation and maintenance, supported by a highly experienced local team. This capability aligns closely with MARCH's national engineering services and strengthens our presence across key sectors.

Tecker will continue to operate as part of our MARCH Process capability with the same people, leadership and customer commitments in place. As part of our integration plan, the MARCH brand will be introduced across Tecker's systems and materials over the coming months.
