

Hygiacura Group Acquires Sparkling Solutions to Strengthen South West Presence

3 hours ago

Hygiacura has announced the acquisition of Sparkling Solutions, a respected commercial and domestic cleaning provider based in Radstock, Avon, further expanding the Group's operational footprint across the South West of England.

Sparkling Solutions has built a strong reputation for high-quality cleaning and support services across Bath, Frome, Radstock, Midsomer Norton and the wider Somerset region. The acquisition adds further scale, operational capability and recurring revenue to Hygiacura's growing facilities management platform.

The transaction forms part of Hygiacura's broader acquisition-led growth strategy, supported by the Group's capital markets programme, including the recent Vienna-listed 8.175% Senior Secured Notes due 2029 issued by Hygiacura Finance Limited.

Sacha Jakovljevic, director for Hygiacura Group, said: "Sparkling Solutions represents exactly the type of regional operator we are looking to partner with, strong customer relationships, a reputation for service quality and an experienced operational foundation. Through the support of our capital markets strategy and listed bond programme, we are building a platform capable of consolidating high-quality service businesses across the UK."

Hygiacura stated that existing customers and staff of Sparkling Solutions will continue to receive continuity of service, while benefiting from the wider Group's investment in systems, operational support, technology and commercial development.

The acquisition further strengthens Hygiacura's position as an emerging consolidator within the UK facilities management and support services sector, with the Group actively pursuing additional acquisition opportunities nationwide.

The Group's £3 million 8.175% Senior Secured Notes due 2029 are listed on the Vienna MTF market and form part of Hygiacura's strategy to access public capital markets to support long-term expansion.
