

Kendra Energy Solutions Expands National Capability with Optimised Group Acquisition

5 hours ago

[Kendra Energy Solutions](#) has acquired the Building Energy Management Systems and Remote Optimisation Centre division of Optimised Group in a move designed to strengthen its national service offering and expand its smart buildings capability.

The acquisition will see the existing senior management team and delivery personnel from Optimised's BEMS and ROC division transfer to Kendra, supporting continuity for existing customers while broadening the company's technical expertise and operational reach.

Kendra said the agreement significantly enhances its capabilities across building energy management systems, remote monitoring, analytics and optimisation services.

The acquisition will also expand the reach of Kendra's Remote Optimisation Centre services across its national client base.

Operations will continue from the division's existing regional offices in Ashby de la Zouch, Leicestershire and Sittingbourne, Kent, maintaining local support and continuity for both customers and employees.

Strengthening smart buildings and energy optimisation expertise

Chris Mills, Executive Director at Kendra Energy Solutions, said the acquisition aligns closely with the

company's long term growth strategy.

"We have known and respected the BEMS and ROC management team at Optimised for a number of years and have always regarded their technical offering and client focused approach very highly," he said.

"We are delighted to welcome both their team and clients into the Kendra family and look forward to building on the strong relationships they have already established, whilst continuing to develop and deliver our high quality services."

Kendra said the move reinforces its position within the UK smart buildings and energy optimisation market, where demand for intelligent building management and remote monitoring services continues to grow.

Focus on operational performance and client value

Gary Bark, Commercial Director at Optimised, said the combined business would strengthen service delivery and market capability.

"Joining Kendra marks an exciting new chapter for our business," he said.

"We share a strong commitment to our work ethics, client service and delivering business outcomes that drive real value and believe that together we will create an even stronger offering to the market through the combined capability."

The acquisition marks another stage in Kendra's continued expansion strategy as organisations across the commercial property and FM sectors increasingly invest in smart building technology, energy efficiency and data driven operational management.
