

A New Chapter for Graffiti Removal Ltd

2 hours ago

Graffiti Removal Ltd has entered a new chapter as part of Fisher Darville Holdings Group, strengthening a trusted name in specialist graffiti removal products, practical support and industry expertise.

For customers, continuity remains the focus: the same proven GR product range, informed guidance, practical support and commitment to quality, now backed by the wider resources of Fisher Darville Holdings Group.

The acquisition combines specialist manufacturing knowledge, established distribution support and sector-focused service for facilities management, transport and public-space teams.

Fisher Research, the long-standing manufacturer of the Graffiti Removal range, brings product expertise to the group. Order dispatch will now be handled by sister company Tensid, strengthening logistics and service for customers.

Chairman Anthony Fisher says: "Graffiti Removal Ltd has built its reputation on practical product knowledge, responsive support and proven solutions. Joining Fisher Darville Holdings Group protects that continuity while giving customers the confidence of wider group backing, stronger logistics and continued specialist advice."

Training has also resumed at the Hook facility, with available places now bookable at <https://www.graffitiremovaltd.co.uk/training>.

With Fisher Darville Holdings Group behind it, Graffiti Removal Ltd is well placed to build on its established reputation and support customers with confidence into the future.
